SUMMARY

As a Full Stack Developer, I'm motivated by solving problems and delivering users and businesses excellent solutions. In my current capacity at Salesforce, I work with teams to build large-scale, maintainable Salesforce implementations. Ready, willing and able to learn any new technology or language required to excel!

TECHNICAL SKILLS

- Salesforce CRM- including Sales and Service clouds, Omnistudio, and Apex programming
- React, NodeJS, Express, MongoDB, MySQL, AJAX, REST API's, more
- HTML and CSS, as well as JavaScript, Python, Apex, and Java programming languages

EXPERIENCE

Salesforce - Associate Technical Consultant

Atlanta, GA

July 2021 - Present

- Build scalable, maintainable Salesforce solutions for companies serving millions of people
- Achieve a minimum of 4 out of 5 on Project Satisfaction rating for every project assignment
- Design and execute large-scale database solutions and business processes for massive, multi-state Insurance companies
- Work in team environment with various DevOps processes and maintain constant communication with all Stakeholders during projects

Sevaa Group - Junior Developer

Atlanta, GA

Feb. 2021 - June 2021

- Write Cypress.io tests for web-applications
- Update, maintain, and develop enterprise level web-apps running on Drupal, Wordpress, React and other popular CRM's and frameworks.

PROJECTS

AllHues | Repo: <https://github.com/siegelal7/allhues> | Deployed Link: <https://allhues.herokuapp.com/>

- AllHues is a full stack portal for influencers to further interact with their followers
- Tools used: React, NodeJS, JWT, BCryptJS, Express, MongoDB (Mongoose), more

Seekr | Repo: <https://github.com/siegelal7/Seekr> | Deployed Link: <https://seekr-jobs.herokuapp.com/>

- Inspired by web development Kanban boards, Seekr is a tool to track job application process
- Drag and drop progress page to denote where you are in the process
- Tools used: JavaScript, NodeJS, Handlebars, Passport authentication, more
