SUMMARY

Full Stack Web Developer and graduate of the Georgia Tech Coding Boot Camp in addition to holding a bachelor's degree in finance. As a constant learner, I'm always working on side projects to sharpen my full stack skill set. Currently, I have been working predominantly with the ReactJS library with a NodeJS/Express backend and MongoDB database.

TECHNICAL SKILLS

- HTML and CSS, as well as JavaScript, and Python programming languages
- React, NodeJS, Express, MongoDB, MySQL, AJAX, REST API's, more

PROJECTS

AllHues | Repo: <https://github.com/siegelal7/allhues> | Deployed Link: <https://allhues.herokuapp.com/>

- AllHues is a full stack portal for influencers to further interact with their followers
- Influencers can post makeup kits they use, along with affiliate links to generate extra income
- Tools used: React, NodeJS, JWT, BcryptJS, Express, MongoDB (Mongoose), more

Seekr | Repo: <https://github.com/siegelal7/Seekr> | Deployed Link: <https://seekr-jobs.herokuapp.com/>

- Inspired by web development Kanban boards, Seekr is a tool to track job application process
- Drag and drop progress page to denote where you are in the process
- Tools used: JavaScript, NodeJS, Handlebars, Passport authentication, more

Find Your Adventure | Repo: <https://github.com/siegelal7/Find-Your-Adventure> | Deployed Link: <https://siegelal7.github.io/Find-Your-Adventure/>

- Search for National Parks based on interests and desired activities
- Uses National Park Services API to search parks and Mapquest API to provide directions
- Tools used: JavaScript, JQuery, AJAX, more

EXPERIENCE

Sevaa Group - Junior Developer

Atlanta, GA

2021-Current

- Write Cypress.io tests for web-applications
- Update, maintain, and develop enterprise level web-apps running on Drupal, Wordpress, and other popular CRM's and frameworks.
- Collaborate with a team of developers and project managers to tackle continuous, complex projects.
